Inter-Colony Calling Now Available

Listed numbers with 7 in front of them are currently set up.

Inter-Colony Calling is a simplified method of dialing from one switchboard to any other. There is no need to dial the complete switchboard number, wait for the connection and then dial the extension. To use this method, simply dial 7 + your 3-digit assigned number + extension number to connect directly to your party. **For example, to call my home number, dial 7(116)203.** (7 is used for all numbers first, 116 is the number for Birch Hills and 203 is my home extension number.) This works with all colonies, all phone providers, and all phone systems. For further information or to get your switchboard set up with this program (which is free), please see the ad for Colony Phone Systems.

TELEPHONE EXTENSION LIST FOR SHOPS AND BARN'S

For convenience and simplicity's sake, please consider using these extension numbers when installing a switchboard.

WILDFONG
ENTERPRISES

We Build Performance

Wildfong Concaves for John Deere **X9** combines use the same high quality AR 400 plate that we use in all other combine parts. Short for "abrasive resistant" the AR plate is unique to Wildfong. Not just a thin coating of hardener on cheap steel, AR 400 plate strength and durability is unmatched in metallurgy. Almost 4 times harder and 2.5 times stronger than mild steel used by original equipment manufacturers, our concaves have the best lifespan of anything on the market.

Visit us @ www.wildfongenterprises.com

call Russ
306-260-2833

"We have Wildfong Concaves in all our machines. We average 25,000 acres out of a set, with very good results in the tank. Plus, they're great folks to deal with too."

Leon W. - Clearspring Colony, SK

CREATE A QUIETER, MORE COMFORTABLE HOME

SONOpan[®]

Soundproofing Panels for Walls & Ceilings

Trusted by
communities
across the
Prairies

FEATURES AND BENEFITS

ENHANCED PRIVACY

Engineered with optimal density, SONOpan panels effectively absorb airborne sound, significantly reducing noise transmission through walls and ceilings of your home.

ECO-FRIENDLY MATERIALS

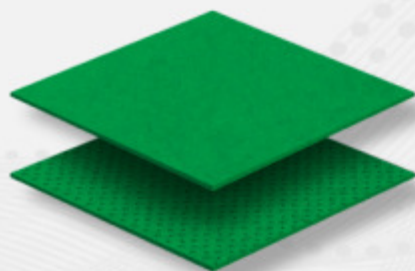

Made from wood fibreboard, with wax and starch binders, our panels are an environmentally conscious choice for your home.

EASY INSTALLATION

Our 4' x 8' x 3/4" panels are simple to install, making them an ideal solution for any shared wall in your home or community buildings.

SONOpan X

Soundproofing Panels for Floors

SONOpanX is designed to absorb impact sound at its source. Great for dealing with footsteps and other structure-borne sounds, these 4' x 4' x 7/16" panels weigh only 9.3 lbs and install easily with staples. A variety of flooring types can be installed over top.

SuperForm™

SuperPex Panel

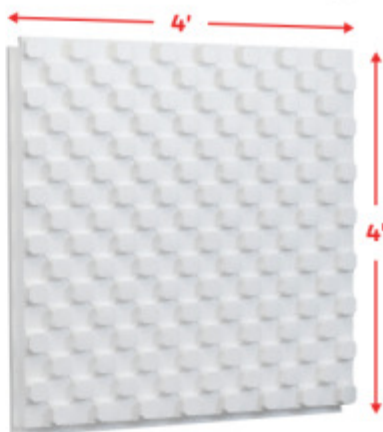

Interlocking Radiant Floor Heat Panel

The SuperPex Panel is a hydronic floor panel made of high-density expanded polystyrene for insulating residential and commercial buildings.

- ▶ Four interlocking shi lap edges
- ▶ The precise cone-shaped puck design allows the contractor to lock the pipe firmly in place and use any size of PEX, including 3/8", 1/2", 5/8", & 3/4" without stapling corners
- ▶ Bridges between pucks lift the tubing for better heat distribution
- ▶ Multi-directional PEX placement

KPF Structural Design Inc. *Empowering Colony Growth Through Expert Structural Engineering*

At KPF Structural Design Inc., we are more than engineers – we are partners in your colony's journey of growth and development. With over 12 years of design experience and an additional 3 years hands-on construction experience, our commitment to structural excellence has been the cornerstone of continued success.

Our Expertise:

- **Structural Engineering:** Specializing in wood, steel, concrete, and masonry structures. We ensure strength, durability, and safety in every project.
- **Foundation Design:** Crafting the solid foundation for your dreams, ensuring the structural integrity of your buildings stands the test of time.
- **Building Additions:** Precision expansion and evolution, seamlessly integrating new elements into existing structures while harmonizing your vision with practicality.
- **Structural Condition Assessments:** Protecting your colony's investments with thorough assessments, providing insights for informed decisions about existing buildings.

Our Commitment:

- **Professional Supervision:** Each project is overseen by a licensed registered professional engineer, guaranteeing competent direction and quality design workmanship.
- **Respect for Dignity:** Maintaining the highest standards of professionalism, respecting the dignity and image of the professions and the colonies we serve.
- **Cutting-Edge Software:** Employing the latest software for efficient and precise designs, optimizing your projects for cost-effectiveness and sustainability.

Serving Colonies Since 2021 Since our establishment in 2021, KPF Structural Design Inc. has proudly partnered with numerous Hutterite Colonies, helping them flourish through sound structural engineering solutions.

Quality and Service Since 1949

Our motto is simple - give people, always, top quality and more for their money - and for more than 70 years, we are still committed to our original values of perseverance, encouragement and innovation

For over 70 years Nelson Lumber Company has been the leading supplier of building materials for residential, commercial, industrial, and agricultural applications across Western Canada.

Our reputation is based on Quality and Service - not only a trusted supplier of building materials, the Nelson Lumber Company operates three roof/floor truss and wall panel manufacturing facilities in Lloydminster and Grande Prairie as well as in the Edmonton region as Winterburn Truss - serving Alberta, Saskatchewan and the BC interior.

Nelson Homes has been serving North American's with ready to move, manufactured homes since 1958 with manufacturing facilities in Lloydminster and High River, Alberta.

Removes tree stumps , Cuts a 52" diameter hole .

Email us at treestumpextractor@gmail.com

Call Jack Holt for more details 403 304 3612

The Tree Stump Extractor is the solution for fast and clean removal of tree stumps. It cuts a clean hole around the stump so that it does not disturb the surrounding soil or buried utilities. It can remove a tree stump in minutes and leave no mess on the lawn. Also once the stump is removed you can either fill in the hole or plant and new tree right away.

THE VALUE OF PARTNERSHIP

When you partner with BLM GROUP, you can expect more than a machine. We offer training, teleservice, preventive maintenance packages, OEM spare and consumable parts inventory...and more.

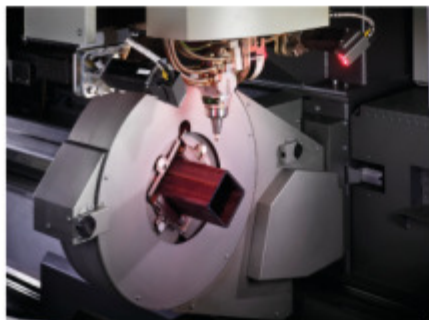

Software

BLM GROUP equips all our machines with advanced software designed to improve process and product quality. You can reduce setup time and easily connect multiple machines with perfect synergy to streamline operations.

Automation

Automated solutions are available to manage continuous operation of BLM GROUP machines. You can configure the machines for your exact needs, whether it's automatic loading/unloading or automated storage and retrieval of sheets or tubes.

Process Monitoring

Active Tools make the most of the power of all BLM GROUP tube and sheet lasers, allowing you to gain the fastest performance and highest quality results. These tools automatically and repeatedly adapt process parameters, independent of the operator's experience.

Service & Support

Our knowledgeable technical service experts ensure you have a superior fabricating experience from your BLM GROUP machine. They are your one-stop-shop for assistance, integration and production management.

INVISIBLE "PROTECTIVE UMBRELLA" FOR BUILDINGS

The wide spectrum of Protectosil building protection products enables you to choose the optimal product or product combination for almost any substrate:

- **Concrete** (*slab, tilt up, cast in place*)
- **Sidewalks, stairs, patio decks**
- **Silage Bunkers**
- **Grain Bin Pads**
- **Hog/chicken/dairy barns**

The use of these products can create water repellency, surface protection and corrosion protection and can prevent serious damage such as:

- **Corrosion of steel reinforcement in concrete**
- **Algae, mold infestation, moss & other contamination**
- **Freeze-thaw damage**
- **Concrete Spalling**
- **Efflorescence**
- **Salt burst**

Protecting your investment with Evonik deep penetrating 100% silane products allows for:

- **Lower maintenance costs**
- **No change in surface appearance**
- **A longer lifespan and service life**

PROVEN GERMAN TECHNOLOGY TO PROTECT YOUR CONCRETE INVESTMENTS

Contact information: **Dukes Distributors**

Dale Johnstone - dalejohnstone@shaw.ca - 403-703-9478

Art Lowther - **Evonik Representative** - 403-333-5513

Data specification for Protectosil products can be found at

www.protectosil.com

It's more than your livelihood, it's your life.

Built on a trusted relationship of more than 60 years working with colonies, we deliver the strategic business solutions and specialized experience you need to build a sustainable and rewarding operation.

***"The ultimate Nu-Era heating solution for
confined livestock and industrial heating"***

- All aluminum and plastic construction does not corrode in high ammonia areas
- Fin design does not clog or plug up, even in very dusty or feathery environments
- **Nu-Era Heaters do not have an open flame.** Open flame units present a very high fire risk in dusty areas. Flame heaters also introduce a lot of humidity and there is a chance of carbon monoxide entering the building. Open flame units can be very detrimental to both humans and animals.
- **NEW! Hinged shroud for easier cleaning!**

CLHBID.COM WAS DESIGNED WITH COLONIES IN MIND

- Is there land close to your colony you would like to buy? We will do mailouts to local farmers inviting them to put their land for sale. Your colony name will never be disclosed.
- Looking for land for a daughter colony? We will work to put a package together without ever disclosing who the end buyer may be. We have Sellers with large blocks.
- We sell a lot of land to colonies across Western Canada each year. Colonies like CLHbid.com as they get an equal chance to buy and never over pay with someone else is just one bid below.

SYNTHETIC INDUSTRIAL GEAR OIL

TRC's Synthetic Industrial Gear Oil is formulated to withstand harsh conditions such as high loads and speeds, high temperatures and high contamination environments typically found in Mining and Quarries, Primary Steel, Manufacturing, Energy Production, Construction, Agriculture and Off Highway applications. TRC's Synthetic IGO provides outstanding load carrying capacity, superior bearing protection, reduced operating temperatures, and excellent oxidation and thermal resistance to prevent degradation of the lubricant in tough environments.

Maximized Efficiency – Careful formulation prevents degradation of the lubricant from oxidation providing sludge free gearsets.

Superior Bearing Protection – TRC's Synthetic IGO only showed 1.1mg of weight loss in the FAG FE-8 bearing test. Many competitive industrial gear oils experience more than 100mg of weight loss.

Reduced Operating Temperatures – Compared to a standard gear oil in the FZG Gear Test, TRC's Synthetic IGO produced a 62° temperature reduction.

Water Separation – Due to its unmatched ability to separate from water TRC's Synthetic IGO will not emulsify with water. **See video demonstration at the link provided with QR code.**
